OVA Setup

Here you'll find a list of steps to install the OVA of the Time Machine Box on VirtualBox (https://www.virtualbox.org/).

Similar steps can be followed to install the OVA on VMWare (https://www.vmware.com/).

1) Launch VirtualBox

2) *File → Import Appliance*

3) Select *TMB Ubuntu 16.04 LTS Server Ver. 1.ova* file

4) Check *Reinitialize the MAC address of all network cards*

5) Select correct network interface

6) Select correct USB port for your host machine

7) Click *Import*

8) Launch VM

9) Log in using

        User: *tmb*

        Password: *tmb*
